# PROJECTS

## TRUBICARS

Trubicars is an online platform that helps users find and book driving schools. It allows learners to schedule lessons with certified professionals to gain proper driving knowledge based on Canadian road rules. After completing their training, users can also get assistance in obtaining their driving license.

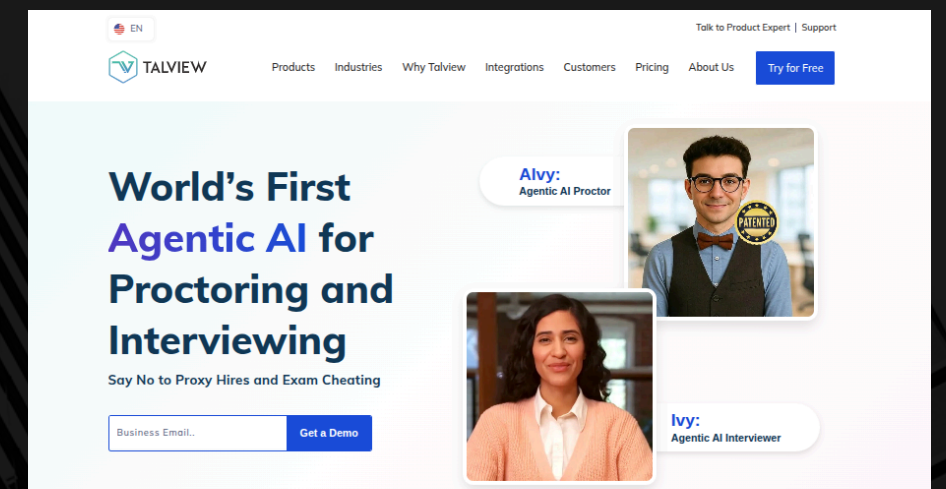

**Technology Stack:** Zend/Laminas, MySQL, JavaScript, jQuery, AWS.

## SUJI

Suji is a fitness technology brand offering a smart compression device designed to enhance muscle recovery, activation, and joint health. Targeted at health-conscious users, athletes, and rehabilitation professionals, Suji combines technology with science-backed wellness solutions.

**Technology Stack:** Shopify, HTML5, MySQL, Redis.

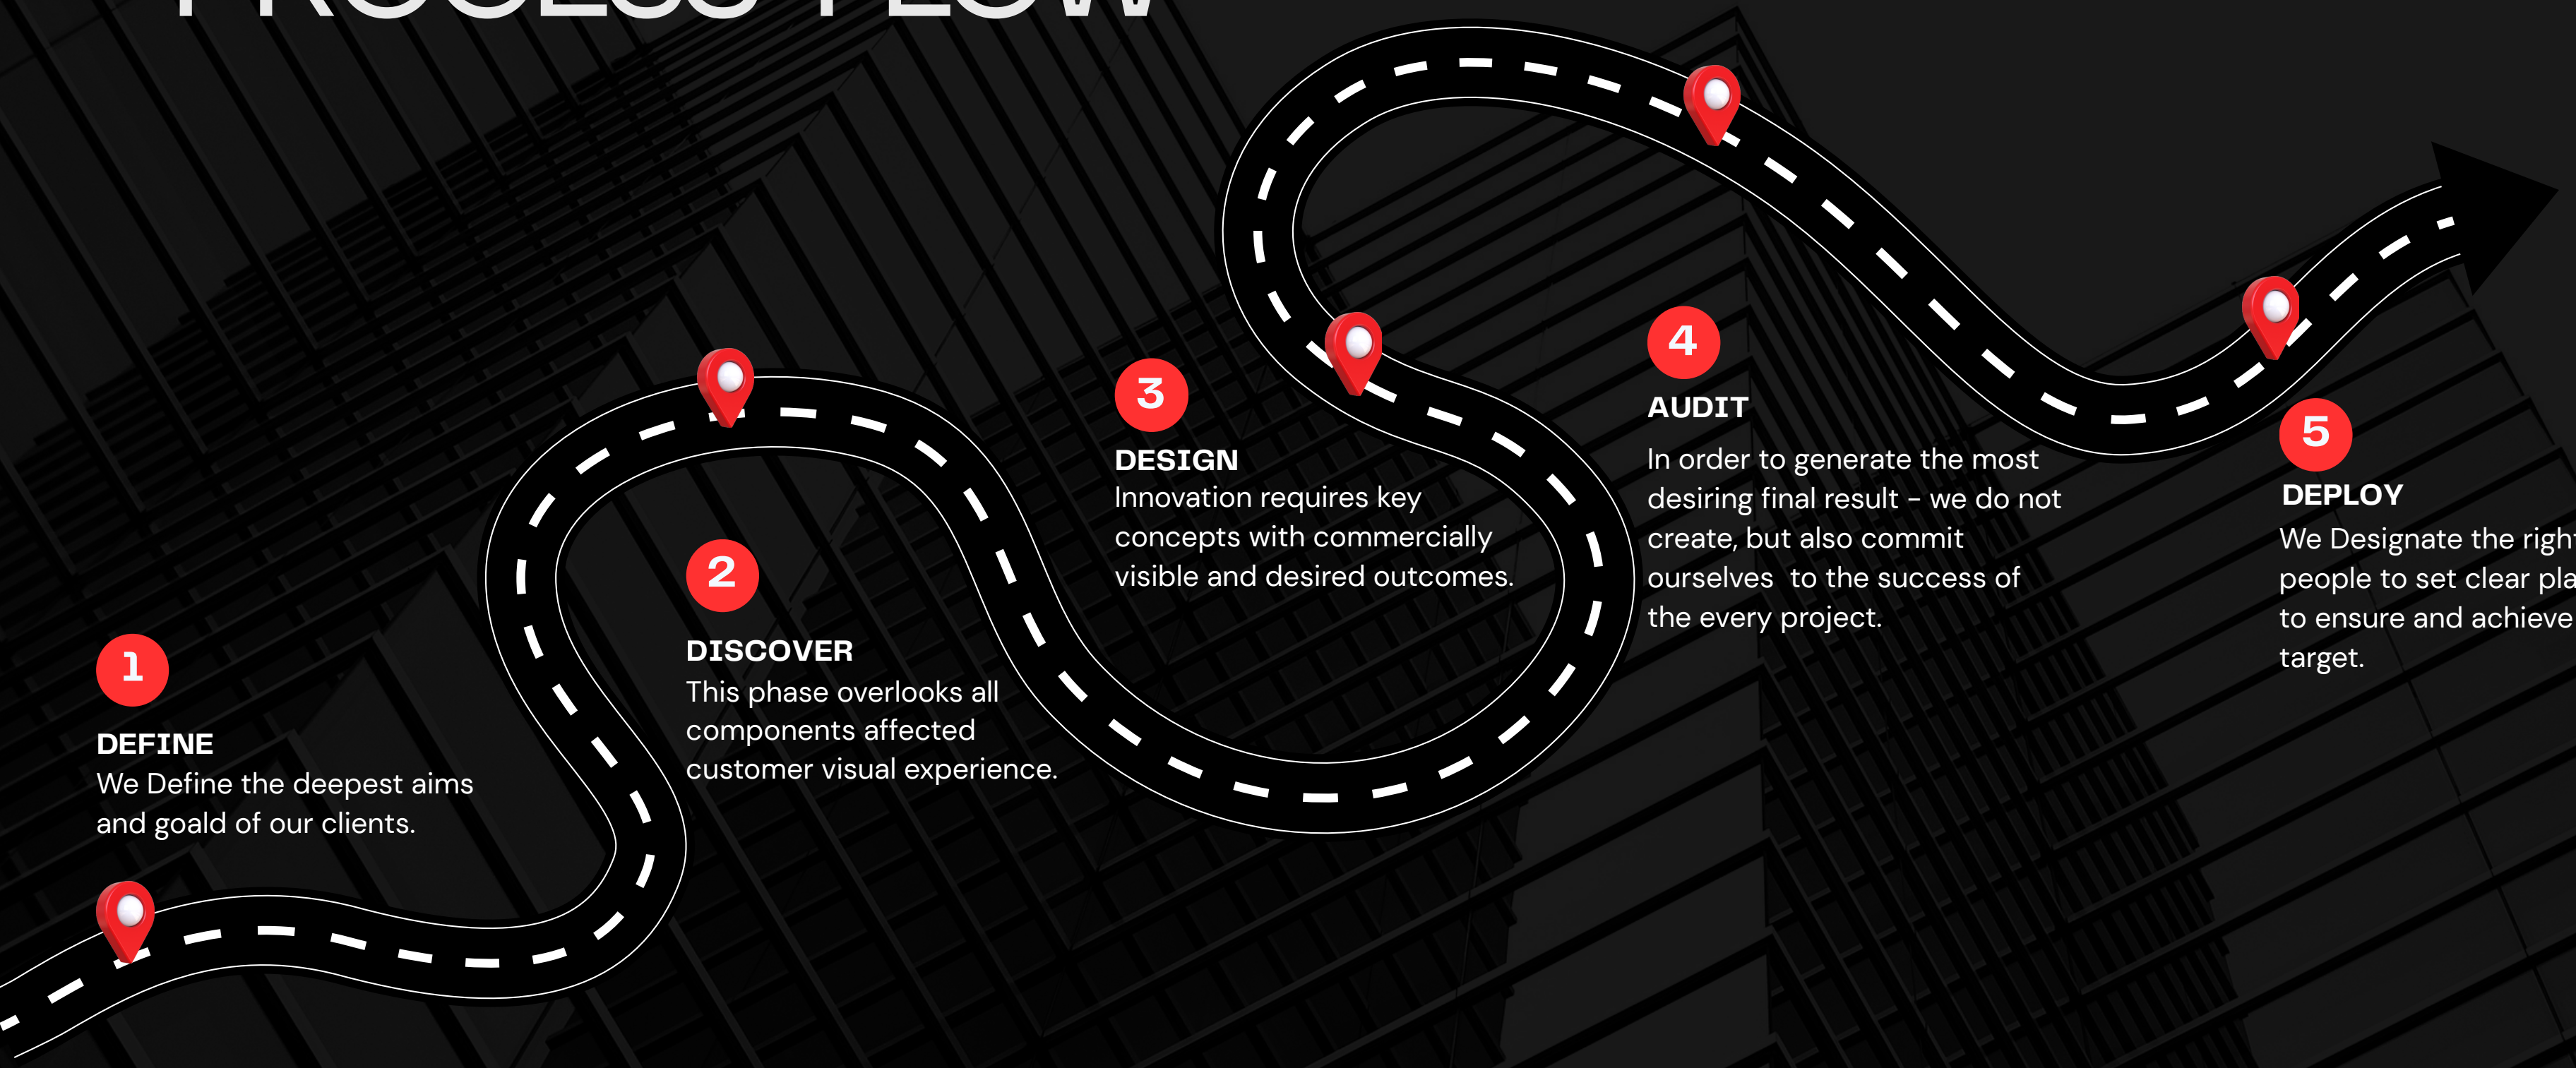

## Talview

Talview is a global leader in AI-powered talent acquisition and assessment solutions. Their platform offers end-to-end capabilities for recruitment, including video interviewing, proctoring, and skill assessments. Trusted by enterprises worldwide, Talview aims to streamline hiring processes and ensure fair, unbiased evaluations.

**Technology Stack:** React.js, HTML5, CSS, Ruby on Rails.

# PROCESS FLOW

1

## DEFINE

We Define the deepest aims and goal of our clients.

2

## DISCOVER

This phase overlooks all components affected customer visual experience.

3

## DESIGN

Innovation requires key concepts with commercially visible and desired outcomes.

4

## AUDIT

In order to generate the most desiring final result - we do not create, but also commit ourselves to the success of the every project.

5

## DEPLOY

We Designate the right people to set clear plans to ensure and achieve our target.
